Professional Summary

Impact-driven Senior Frontend Developer specializing in the React.js and Next.js ecosystem. Proven track record of architecting scalable enterprise applications, optimizing web performance, and mentoring engineering teams. Adept at leveraging modern state management, cloud services, and AI-driven development tools to accelerate feature delivery and build robust, localized, and highly performant web applications.

Technical Skills

- Core: React.js, Next.js (App Router), TypeScript, JavaScript (ES6+), HTML5, CSS3/SASS
- State & Data Fetching: Redux Toolkit, TanStack Query (React Query), Context API
- UI & Styling: Tailwind CSS, Material UI (MUI), shadcn/ui, Framer Motion, Responsive Design
- Architecture & Performance: Progressive Web Apps (PWA), Server-Side Rendering (SSR), Static Site Generation (SSG), Core Web Vitals Optimization, LTR/RTL Localization (next-intl)
- Backend & Ecosystem: Firebase (Auth, Firestore, Cloud Messaging), REST APIs
- Tools & DevOps: Git, Yarn, Vercel, Sentry, Vitest, React Testing Library, Figma, n8n automation, CI/CD
- AI Development: Claude Code (Certified), Windsurf, Agentic Workflows

Professional Experience

GuestNa | Aug 2024 – Present | KSA (Remote)

- GuestNa B2B Portal: guestna-edu.com
- GuestNa B2C Portal: guestna.app

- Architected an enterprise-grade migration to Next.js 14 (App Router) with Progressive Web App (PWA) support, achieving a 35% improvement in Lighthouse performance scores and full offline usability by implementing route-based bundle splitting and service worker caching.
- Engineered an efficient asynchronous data synchronization and caching layer for B2B and B2C portals, reducing redundant API queries by 40% through the integration of TanStack Query alongside a customized Redux Persist store.
- Spearheaded the deployment of a fully localized, multilingual platform (English/Arabic/French) with comprehensive Right-to-Left (RTL) support, increasing user acquisition in regional GCC markets by 25%.
- Optimized marketing tracking, search engine visibility, and platform security by integrating Google Analytics 4 (GA4), Google Tag Manager (GTM), and Geolocation-based routing, boosting organic traffic by 30%.
- Designed a highly customizable dynamic theming system, providing users with an accessible interface that instantly adapts to system preferences and personalized styling configurations.
- Secured application boundaries against client-side exposure, maintaining 100% protection against XSS attacks and achieving strict PCI compliance via Next.js proxy route handlers and Content-Security-Policy (CSP) middleware for Apple Pay integrations.
- Enhanced production diagnostic coverage and real-time observability, decreasing Mean Time to Resolution (MTTR) of critical UI anomalies by 45% through end-to-end Sentry tracing and automated sourcemap uploads.

Arabia IT | Oct 2023 – Aug 2024 | KSA (Remote)

- **Saea App (Ministry of Endowments):** sae.org.sa
- Developed the governmental "Saea App" for the Ministry of Endowments, accelerating administrative workflows by 30% by engineering a responsive, scalable frontend architecture utilizing Next.js and secure REST API integrations.
- Streamlined complex governmental data collection and processing, reducing user input errors by 25% by architecting a reusable UI component library and robust client-side validation pipelines using Formik and Yup.

- Improved cross-device application usability and layout stability, decreasing UI-related bug reports by 40% by establishing rigorous debugging protocols and fluid responsive design patterns.

Freelance Projects & Applications

Waratel LMS | wartel-academy.com/ar

- Tech Stack: Next.js (App Router), TypeScript, Redux Toolkit, TanStack Query, Tailwind CSS, Firebase, PWA, Sentry, GA4, GTM, Vitest
- Features: Built a multi-role architecture featuring dedicated portals for Students, Teachers, and Parents. Developed a premium glassmorphic UI with a professionally engineered system-wide dark mode and automated Arabic/English layout switching. Integrated GA4 and Geolocation targeting for enhanced SEO. Implemented real-time communication utilizing Firebase Cloud Messaging (FCM) for push notifications, secured by reCAPTCHA.

Daily Quran Examination App | quran.watawanu.com

- Tech Stack: Next.js, Tailwind CSS, Firebase Auth & Firestore, TypeScript, Framer Motion, PWA
- Features: Created custom state hooks for decoupled logic, robust PWA features for offline mobile access, secure authentication flows, decoupled theme resolvers to eliminate UI flickering, and advanced LTR/RTL support.

Tasty Food | tasty-food-eta.vercel.app

- Tech Stack: Next.js, REST API, Formik, Yup, AOS, React Swiper, SASS, Material UI
- Features: Programmed a comprehensive multi-page application built from scratch featuring dynamic English/Arabic language toggling, system-wide dark mode, advanced product filtering capabilities, and a reusable component architecture.

Atomica (Figma Plugin) | Custom Color System Generator |

<https://www.atomica.design/>

- Tech Stack: HTML, CSS, JavaScript, Figma API
- Features: Engineered AI-driven generation of color palettes; developed the ability to group colors into custom-named collections with seamless one-click export of styles, variables, and JSON files directly for developer handoff.

Foodly (E-Commerce Platform) | foodly.amrbdr.com

- Tech Stack: jQuery, JavaScript, CSS3, HTML5
- Features: Delivered an extensive 14-page custom web application encompassing Landing, About, Cart, Checkout, Shop, Menu, Testimonials, Contact, and FAQ pages with responsive layouts.

Education

Bachelor of Civil Engineering

Ain Shams University, Cairo, Egypt | *Sep 2015 - Sep 2020*
